

## 5 Types of Animation

- 1) Traditional
- 2) 2D Vector Graphics
- 3) 3D Computer Animation
- 4) Motion Graphics
- 5) Stop Motion and Claymation

You should be able to discuss the purpose, uses, and characteristics of each of these types

YouTube Video from Bloop Animation— “The 5 Types of Animation”

High Level Skills you should think about to take your work to the next level:

- ✓ Have a story—plan your animation using story boards and scripts
- ✓ Timings are crucial
- ✓ Get regular feedback from others
- ✓ Be bold and try new ideas!

*Top Tips*

The difference between a good animation and a great, one comes down to how transitions are handled
