**Rich Content**—Features such as videos, audio, and rollovers

High Level Skills you should think about to take your work to the next level:

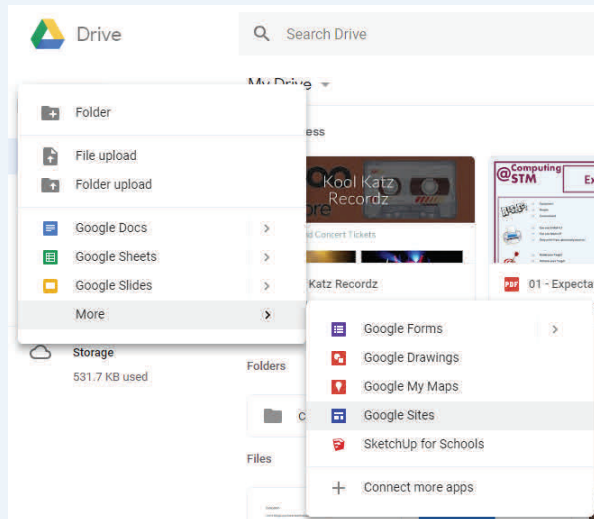

- Plan your website using visualisation diagrams and mood boards
- Treat your home page as a taster of what your website has to offer
- Sometimes, less is more!
- Use good quality, well manipulated images

*Top Tips*

Don't think that you have to use lots of colour, some of the best websites are minimalist with a white background

## Create a new Google Site from your Drive Folder

Google  
Sites

Creating a  
Website

Homepage  
design

## Extra Challenge

Your challenge is to design a multi-page website for a charity or good cause of your choosing. It should highlight the main issues of the cause, have rich content, be aesthetically pleasing, looking smart and professional.

You should have some detailed designs in the way of a mood board and visualisation diagrams

## Extension

Allowing your customer to get in touch is an essential feature of modern websites. You might want to include a contact form, and social media icons that use rich features.

You might also want to create a donations page.
