

### Computer Misuse Act

There are 4 offenses under the Computer Misuse Act:

- 1) Using a Computing device without permission
- 2) Using a Computing device with the intention of committing a crime
- 3) Using a computing device to create or distribute material that can be used in a crime
- 4) Using a computing device in order to change or delete data or files

Each of these is a criminal offence and can see you being sent to prison

### Copyright Design & Patent's Act

It is against the law to use the work of others without their permission. These might be: images, music, research, photos, movies, and even ideas!

You can get massive fines for breaking the law

### Creative Commons Licensing

Created work is released and the author decides how others can use their work

### Ethics

**Social** How does technology affect people? Will robots help us in the home and at work? Will society become more lazy? How will technology affect literacy?

**Environment** How does technology affect the environment? Will we need to use more electricity as we get more technology? How will we power it? What will happen to all our old devices?

**Economic** Will our future products cost less? Will poorer countries be able to afford the Internet? Will we all still have jobs in the future?

*Top Tips*

Being a responsible digital citizen, means that you think about the needs of others too. Even if they live half-way round the world!
