

### **How will my work be assessed?**

Your progress will be monitored by internal assessments leading up to the final written examination at the end of Year 11. In Year 10 and 11 you will undertake controlled assessment tasks which are internally assessed and moderated by the exam board.

### **External Assessment**

Written exam (2 hours). The exam is worth 60 marks, 25% of qualification

NEA – Non-exam assessments. Students will complete 3 pieces of coursework each worth 25% of the overall qualification

### **How can I use this course after Year 11/ in the future?**

The need to increase our manufacturing base has become increasingly more apparent and there is a wide and varied range of exciting career opportunities linked to this subject. The link to **Engineering apprenticeships** is well documented but here are just a few other examples:

Architecture	Teaching
Building and construction	Product design
Civil engineering	Computer aided design
Electrical engineering	Computer aided manufacture

(Product design is offered as an A-Level course at our school and students who study GCSE Engineering would be well placed to go on to study this A-Level.)

### **If I want to know more I should ask...**
